

Transient Tracers for climate and ocean health assessments

Guest Speaker:
Dr. Toste Tanhua, Senior Scientist,
GEOMAR (Kiel, Germany)

Date: Thursday, January 26th at 12pm-1pm ET

Location: NOAA Central Library, 2nd Floor, SSMC#3 and webinar

Measurements of oceanic transient tracers has been a central theme of Dr. Tanhua's research, particularly the use of transient tracers to detect and quantify temporal changes in ocean ventilation and ocean storage of anthropogenic carbon.
